#### Voice Network

Pursuant to 47 C.F.R. § 54.313(a)(5) and or 47 C.F.R. § 54.422(b)(3) Albion Telephone Company, Inc. ("ILEC") is in compliance with appropriate FCC Service Quality Standards and Consumer Protection Rules. ILEC provides CPNI training to all of its new employees and in addition trains all of its existing employees on an annual basis. ILEC also conducts subscriber outreach regarding CPNI by placing CPNI explanation onto its website at <a href="https://www.atcnet.net">www.atcnet.net</a> which informs subscribers about CPNI rules and explains Idaho Public Utility commission rules regarding customer relations. In addition ILEC trains staff on Red Flag issues on an annual basis. All company employees are required to sign and acknowledge that they have completed CPNI and Red Flag training and understand obligations to adherence of applicable rules.

ILEC also outlines its rates, terms, and conditions under which ILEC offers service in its Local Exchange Tariff. The tariff explains customer rights and obligations, customer service, dispute resolution, deposits, billing and payment options, disconnection of service as well as cancellation of service options. ILEC keeps its tariffs available for public inspection at its business offices.

#### **Broadband Network**

Pursuant to 47 C.F.R. § 54.313(a)(5) and or 47 C.F.R. § 54.422(b)(3) Albion Telephone Company, Inc. ILEC is in compliance with applicable FCC Service Quality Standards and Consumer Protection Rules. ILEC trains staff on applicable rules for broadband services issues on an annual basis. In addition ILEC has placed on its website at <a href="https://www.atcnet.net">www.atcnet.net</a> its network practices and policies regarding FCC's Net Neutrality Rules.

ILEC also outlines its rates, terms, and conditions under which ILEC offers Broadband service in NECA Tariff #5 to Internet Service Providers ("ISP"). The Tariff explains customer rights and obligations, customer service, dispute resolution, deposits, billing and payment options, disconnection of service as well as cancellation of service options. Public inspection of NECA Tariff #5 can be found on NECA's website. Retail DSL rates, terms, and conditions for retail services are provided by the ISP.

#### Functionality in Emergency Situations:

#### Voice Network

Pursuant to 47 C.F.R. § 54.313(a)(6) and 47 C.F.R § 54.22(b)(4) as set forth in 47 C.F.R. § 54.202(a)(2) Albion Telephone Company, Inc. ("ILEC") meets the requirements to remain functional in emergency situations and has the following capabilities: Back-up power is provided to ILEC central offices by use of a generator and batteries that provide it with 8 to 12 hours of emergency power. In addition, ILEC field electronics have 8 to 12 hours of back-up power by use of generators and batteries. ILEC also has ERP, SONET, DWDM, and MPLS technology deployed in its core fiber optic network that is a self-healing and will automatically reroute traffic should a fiber cut occur. ILEC has also sufficient spare cards for its fiber optic network to provide almost instantaneous replacement should there ever be a card failure in the core network. ILEC also has proper staff in place to repair any fiber cuts in a timely manner. ILEC has connectivity with neighboring telephone exchanges as well as the LATA tandem to provide diverse options to reroute traffic should an emergency arise. ILEC has developed and trained its staff on network preparedness plans in case of emergency situations. ILEC is prepared and capable of managing traffic spikes resulting from emergency situations and has sufficient switching capabilities to handle such situations.

#### **Broadband Network**

Pursuant to 47 C.F.R. § 54.313(a)(6) and 47 C.F.R § 54.22(b)(4) as set forth in 47 C.F.R. § 54.202(a)(2) Albion Telephone Company, Inc. ("ILEC") meets the requirements to remain functional in emergency situations and has the following capabilities: Back-up power is provided to ILEC central offices by use of a generator and batteries that provide it with 8 to 12 hours of emergency power that is also used to provide service to the broadband network. In addition, ILEC field electronics have 8 to 12 hours of back-up power by use of generators and batteries. ILEC also has ERP, SONET, DWDM, and MPLS technology deployed in its core fiber optic network that is a self-healing and will automatically reroute broadband traffic should a fiber cut occur. ILEC has also sufficient spare cards for its fiber optic network to provide almost instantaneous replacement should there ever be a card failure in the core network. Response to Line 1010 Albion Telephone Company, Inc. 472213

#### Voice Services Comparability Report

Pursuant to 47 C.F.R. § 54.313 (a) (10 ) Albion Telephone Company, Inc. ("ATC") is in compliance with the requirement that voice services is no more than two standard deviations above the national average urban rate for voice service of \$47.48 as specified in Public Notice DA 15-470 issued on April 16, 2015. ATC's current total local end-user rate<sup>1</sup> of \$25.92 (which includes a local fee of \$0.00, mandated state fees of \$0.16 and mandatory extended area service charges of \$0.00) is not above the standard deviation as specified in the USF/ICC Transformation Order. <sup>2</sup>

<sup>1</sup> Local End User Rate as defined in USF/ICC Transformation Order 26 FCC Rcd at 17751, Para. 238

<sup>&</sup>lt;sup>2</sup> USF/ICC Transformation Order, 26 FCC Rcd at 17694, Para. 84 (footnote included) "The standard deviation is a measure of dispersion. The sample standard deviation is the square root of the sample variance. The sample variance is calculated as the sum of the squared deviations of the individual observations in the sample of data from the sample average divided by the total number of observations in the sample minus one. In a normal distribution, about 68 percent of the observations lie within one standard deviation above and below the average and about 95 percent of the observations lie within two standard deviations above and below the average."

#### REPORT OF INDEPENDENT AUDITORS

Received & Inspected

JUN 3 0 2015

The Board of Directors Albion Telephone Company, Inc. FCC Mell Room

#### Report on the Financial Statements

We have audited the accompanying consolidated financial statements of Albion Telephone Company, Inc. (Company) and subsidiary, which comprise the consolidated balance sheets as of December 31, 2014 and 2013, and the related consolidated statements of income, stockholders' equity, and cash flows for the years ended, and the related notes to the consolidated financial statements.

#### Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these consolidated financial statements in accordance with accounting principles generally accepted in the United States of America; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

#### Auditor's Responsibility

Our responsibility is to express an opinion on these consolidated financial statements based on our audits. We did not audit the financial statements of Syringa Networks, LLC, the investment in which, as discussed in Note 2, is accounted for by the equity method of accounting. The investment in Syringa Networks, LLC was and as of December 31, 2014 and 2013, respectively, and the equity in its net income was and respectively, for the years then ended. Those statements were audited by other auditors, whose report has been furnished to us, and our opinion, insofar as it relates to the amounts included for Syringa Networks, LLC is based solely on the report of the other auditors. We conducted our audits in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in Government Auditing Standards, issued by the Comptroller General of the United States. Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the consolidated financial statements are free from material misstatement.

Received & Inspected

# REPORT OF INDEPENDENT AUDITORS (continued)

JUN 3 0 2015

FCC Mell Room

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the consolidated financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the consolidated financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the consolidated financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the consolidated financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

#### Opinion

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the consolidated financial position of Albion Telephone Company, Inc. and subsidiary as of December 31, 2014 and 2013, and the results of their operations and their cash flows for the years then ended in accordance with accounting principles generally accepted in the United States of America.

#### Other Reporting Required by Government Auditing Standards

In accordance with *Government Auditing Standards*, we have also issued our report dated March 3, 2015, on our consideration of Albion Telephone Company, Inc. and subsidiary's internal control over financial reporting and on our tests of its compliance with certain provisions of laws, regulations, contracts, and grant agreements, and other matters. The purpose of that report is to describe the scope of our testing of internal control over financial reporting and compliance and the results of that testing and not to provide an opinion on internal control over financial reporting or on compliance. That report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering Albion Telephone Company, Inc. and subsidiary's internal control over financial reporting and compliance.

2014 Audit Exit Memo

#### Another great year!

Another great year for the accounting team. We know it takes a lot of time and effort to be prepared and appreciate the hard work by everyone to make it happen.

Received & Inspected

#### 2014 AUDIT COMMENTS

JUN 30 2015

#### Fully depreciated plant

The majority of ATC's circuit equipment is either fully depreciated or will be within the next two years. As assets become fully depreciated, new assets also become fully depreciated in a short period of time which prevents you from including the assets in rate base for the full life of the asset. As you plan major upgrades in the next few years, we recommend you consider sub-accounts for the newer assets which will prevent them from depreciating quickly. We also recommend that you review the CPR's for all the assets that should be retired. A small plant base will slow down the new assets becoming fully depreciated.

#### AFUDC

With construction being lighter in the last few years, ATC hasn't recorded AFUDC on construction projects as the amounts weren't significant. With the capital expenditures planned for the next couple of years, the amount of AFUDC that should be recorded will likely be much more significant. We recommend this be monitored and recorded as appropriate. Companies generally calcaulate AFUDC on work orders that are expected to cost more than \$100,000.

#### Internal control testing

The purpose of our audit was to express an opinion on the financial statements and not to express an opinion on the effectiveness of internal control. That said, our audit procedures included consideration of internal control over financial reporting and procedures to test the effectiveness of internal controls that impact other procedures we perform to complete the audit.

Adjusting journal entries identified during the audit (and attached to this memo) are generally linked to a control deficiency.

 We have reviewed the cause of all proposed and actual adjusting journal entries and determined that they do not rise to the level of significant deficiencies or material weaknesses.

#### NEW RULES, DEVELOPMENTS AND ACCOUNTING ALERTS

JUN 3 0 2015

#### New revenue recognition standard

FCC Mail Room

In May of 2014, the FASB released ASU 2014-09, Revenue from Contracts with Customers, to clarify the process of recognizing revenue, provide a framework for addressing revenue issues and to improve comparability of revenue recognition practices across entities, industries, jurisdictions and capital markets. The rules affect any entity that enters into a contract with customers to transfer goods or services. This represents a broad category and will include many telecommunications companies that enter into service contracts with customers (i.e. wireless service agreements for handset discounts) or contracts with other customers or carriers for transport or access services where there is a commitment to provide a specific type of service over a defined period of time.

The new standard provides a framework for consistently assessing revenue recognition that may be different from current practices, particularly when there is more than one element associated with the customer contract.

While the new rules will not go into effect until 2017, it may require a fair amount of advance planning and analysis to determine the impacts on your company's operations. We work with you over the next year or so to identify areas of your business that may be subject to the new rules.

#### Access arbitrage

With the structured reduction of terminating state and interstate carrier access rates under the new regulatory regime, there is incentive for carriers paying the rates to report traffic as terminating rather than originating. We are recommending that companies implement an internal control to monitor the ratio of terminating access to originating access so unusual and unexplained fluctuations in traffic patterns can be identified and resolved. While this will not impact the bottom line for interstate carrier access due to the NECA settlements and pooling process, improperly classified originating access would most likely be underbilled to the carriers and could unnecessarily reduce support from the Connect America Fund.

#### USAC/FCC audit update

Last year, USAC began to conduct full audits under the Beneficiary/Contributor Audit Program (BCAP). BCAP is the successor oversight program to the FCC OIG audits conducted in three waves from 2007 to 2010 and represents the USAC's long-term plan for oversight of companies that contribute to and receive funding from the Universal Service Fund. USAC will be significantly expanding this program during 2015 and conducting substantially more audits next year and in the future.

The audits will be performance audits rather than attestation examinations, which should lead to a more efficient process that is less invasive. Performance audits also allow auditors to focus on certain areas of carriers' operations with greater risk for errors or noncompliance with FCC rules.

We anticipate that the following areas will be considered high risk and will receive significant attention from the auditors conducting the work:

Continuing property records

FCC Form 499-A

Separations study adjustments

CONFIDENTIAL FINANCIAL INFORMATION – SUBJECT TO PROTECTIVE ORDER IN WC DOCKET NOS. 10-90, 07-135, 05-337, 03-109, 14-58, CC DOCKET NOS. 01-92, 96-45, GN DOCKET NO. 09-51, WT DOCKET NO. 10-208, BEFORE THE FEDERAL COMMUNICATIONS COMMISSION.

Part 64 allocations

Affiliate transactions

CO equipment classification

While we perform procedures on some of these areas as part of our financial statement audit, we recommend that the Company review the processes, outputs and controls around each of these & inspected high risk areas.

#### **Income Tax Comments**

JUN 3 0 2015

#### Accelerated tax depreciation

After much deliberation, Congress decided just before the end of the year to extend the provisions allowing 50% bonus depreciation and increased Section 179 expensing limits for the 2014 tax year. If your company's estimated tax deposits were calculated without the increased bonus deductions, you could be eligible for a refund of those taxes. This refund can be claimed on an expedited application if filed by March 15th, 2015. Otherwise it will be claimed when the tax return is filed. Our tax team will contact you to determine if you are eligible and calculate the amount of the potential refund.

#### The Moss Adams Advantage

#### Expanded services and footprint

In January of 2015, we acquired the regulatory consulting and compliance practice of CHR Solutions. In addition to giving us a physical presence with offices in Dallas and Austin, TX, the combination will allow us to provide additional specialized regulatory consulting services that we did not have the experience to provide prior to the combination. We can separately provide you a summary of these new services, but following are a couple of key regulatory compliance issues to consider in 2015.

FCC Form 481 Annual Report: There are new requirements for 2015 that will make the Form 481 more complicated than prior years. Specifically, the FCC has implemented network upgrade mapping and broadband reporting requirements for 2015 and beyond.

FCC Form 477 Broadband Reporting: The FCC continues to make changes to the Form 477, requiring additional detail at the census tract and census block level. Of significant importance is the FCC's new reliance on the Form 477 to determine competitive overlap in rate of return study areas.

FCC Special Access Data Request: The FCC has implemented a detailed data request for providers and purchasers of special access services in price cap territories, which could impact many rural carriers and their CLEC affiliates. This is a first time data request and requires specific information on circuits and pricing, including network mapping. The data request is due on February 27, 2015. Companies that are not required to complete the data collection must submit a certification of exemption.

Lifeline Reporting: The FCC will soon begin audits of lifeline reporting by providers of services, including the FCC Form 555. We have discovered some common errors made by many reporting carriers that may result in findings that companies should be aware of. A review of the Form 555 may be a good precautionary measure.

FCC MARI ROOM

CAF/ICC True Up & Forecast: NECA's annual CAF/ICC True Up and Forecast is rapidly approaching, with the initial due date in April and a final submission in May. This filing provides historical and projected information on switched access minutes of use and revenues associated with the FCC's reform of interstate switched access and intrastate originating switched access. Due to some issues in last year's filing, NECA will look more closely at the reporting of exogenous costs. In addition, information on double recovery from the 2013 cost study is required with this filing.

#### New training opportunities

We are developing two new courses for our Las Vegas seminar program based on feedback we have received from our clients and seminar participants. Both courses will be presented as part of our 2015 curriculum.

Interstate revenues: One of our new courses is a seminar on analyzing and accounting for interstate revenues. We have found over the years that many companies struggle with understanding the changes in revenues, explaining the variances, and how to estimate future revenues, particularly in an environment where the rules are changing. Our goal with the class is to help de-mystify interstate revenue. The course is designed to be hands-on with all participants using real forms and examples. We want to help accountants better understand how the cost study impacts revenues, how your accounting impacts settlements, and how you can better account for your revenues to catch errors, explain variances and maximize revenue within the framework of the FCC's rules. This course is very different than the cost study classes as we won't be covering the details of how to prepare a cost study.

Special access, dark fiber and private line: This course covers the critical role that special access, private line and other customized network capacity services play in helping carriers compete as well as the issues and opportunities carriers encounter in delivering these services. We'll cover the types of services today's diverse carriers are offering, network elements and configuration, pricing strategies, indefeasible rights of use, wireless backhaul, data centers and reporting and billing challenges. With these services playing a leading role in driving revenue growth, having internal expertise in this area can help companies maximize their opportunities.

#### Business Continuity/Disaster Recovery

Business continuity and disaster recovery is the process of preparing to respond to, recover from, and resume and restore mission critical functions when faced with crises. Telecommunications networks are subject to a wide variety of potential crises, from power outages to natural disasters, and regardless of the situation customers rely on these networks to cope with the issues at hand. Being prepared to keep the network up and running, or to quickly restore it to operations, is a vital aspect of maintaining customer safety and loyalty, and ensuring the ongoing financial well-being of your organization. Moss Adams has a comprehensive set of business continuity and disaster recovery services that include: reviewing your preparedness and developing a road map, assessing risks and analyzing business impacts, developing an emergency response plan, performing tests of the plan, and regularly maintaining and updating the plan.
